DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to monitoring vessel flow to consider closing or opening of lanes, classified in class 701, subclass 117.
 - II. Claim 2, drawn to monitoring vessel flow and informing waiting time, classified in class 340, subclass 430.
 - III. Claim 3, drawn to vessel image analysis, classified in class 382, subclass 104.
2. Inventions group I, group II and group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions group I, II, and III has separate utility such as determining the number of service gate, informing waiting time to the customers, and image analysis. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
